

# PEACEFUL PETALS

A giant flower seat to place in a garden, back yard, or wherever you want to create a tranquil setting.

Inspired by the sheer beauty of all flowers and how they have a calming affect they have on our state of mind.

In life sometimes all you need is to just take a step back, breath deeply, and appreciate

all the nature that is around you. In doing so you need a place to rest.

This seat was designed to give someone a spot to truly relax.
